Career Objective

Aspiring Software Engineer with strong problem-solving and programming skills, passionate about building efficient and scalable software solutions. Experienced in web development, Cloud Automation and AI-based projects, with a keen interest in modern technologies and innovation. Seeking an opportunity to apply my technical skills, learn continuously, and contribute to impactful software development.

Education

Bannari Amman Institute Of Technology Tamil Nadu, India	2023 – 2027
• Course : B.E. Electronics and Communication Engineering • CGPA : 8.63/10 (upto 5th semester)	
St.Mary's Matriculation Higher Secondary School Tamil Nadu, India - HSC	2022 – 2023
• Percentage : 93.60%	

Experience

Full-Stack Development Workshop, Crayon'd, Chennai (8 Months) :

Developed and deployed scalable web applications using React and Next.js following structured Git workflows and modular architecture.

Student Special Group (SSG) Member (1 Year) :

Undertook 6 months of training in web development and programming, followed by developing projects such as the **S7 Project Portal** for managing student projects and events.

Skills

Skills : C, Java, JavaScript | ReactJS, NextJS, HTML, CSS, Tailwind CSS | NodeJS, ExpressJS, FastAPI, REST APIs | MySQL, PostgreSQL, MongoDB, Redis | Git, GitHub, VS Code, Postman, Linux, Bash, Slack | Docker, Kubernetes, Helm, NGINX Ingress, Jenkins, GitHub Actions | AWS (EC2, S3, IAM, ASG, ELB, CodePipeline, CodeBuild) | Prometheus, Grafana

Interests : Cloud, Automation, Full Stack Development .

Projects

- **[Smart Grievance Redressal System \(Individual\)](#)**: Full Stack Developer | React.js, Node.js, Flask, NLP, Machine Learning – Developed an AI-driven grievance classification system using TF-IDF and Naive Bayes to process unstructured text, automate complaint routing, and enable data-driven decision making through real-time API integration. Evaluated model performance using accuracy, precision, and recall metrics
- **[URL Shortener with Analytics \(Individual\)](#)**: Full Stack Developer | Node.js, Express.js, PostgreSQL, Prisma, Redis, Docker – Developed a URL shortening platform with authentication, short link generation, redirection, and analytics features for tracking clicks, timestamps, device, and usage insights.
- **[KubeWise AI \(Individual\)](#)**: DevOps, Cloud & AI | Kubernetes, Docker, FastAPI, Prometheus, Grafana, Helm, GitHub Actions, NGINX Ingress – Developed an AI-powered Kubernetes management platform with containerized FastAPI services, automated deployments, ingress-based routing, real-time monitoring, metrics visualization, and intelligent infrastructure recommendations using Docker, Kubernetes, and CI/CD pipelines.
- **[Cloud-Based CI/CD Pipeline Automation \(Individual\)](#)**: DevOps Engineer | AWS, Jenkins, Docker, Git – Built and automated CI/CD pipelines using AWS CodePipeline and Jenkins for streamlined deployments. Containerized applications with Docker and deployed securely on EC2 using IAM, improving release efficiency and reducing manual errors.

Awards & Certification:

AWS Cloud Practitioner Essentials : Completed foundational training covering AWS core services, cloud concepts, security, pricing, and architecture basics.

Winner – Ideathon '24 (BIT): Secured Best Idea Presentation for an AI-powered Motorised Solar Scarecrow using YOLO & sensors for real-time crop protection.
