CAREER OBJECTIVE

Motivated and enthusiastic technology graduate with strong problem-solving and analytical abilities. Passionate about learning new technologies and applying knowledge to solve real-world problems. Seeking an opportunity to grow professionally while contributing to innovative projects and organizational success.

EDUCATION

- B.E. Electronics and Communication Engineering
Bannari Amman Institute of Technology, Tamil Nadu
CGPA: 8.64 / 10 (Up to 5th Semester) | 2023 – Present
- Higher Secondary Certificate (HSC)
Bharathi Matriculation Higher Secondary School
Percentage: 94.16% | 2022 – 2023

SKILLS

- Programming: C, Java, JavaScript, Python
- Web Technologies: HTML, CSS, Bootstrap, React.js
- Core Concepts: Object-Oriented Programming (OOP), Database Management Systems (DBMS), SQL
- AI & Machine Learning: Machine Learning, NLP, Sentiment Analysis, Data Preprocessing
- Database & Tools: MySQL, Git, GitHub, Visual Studio Code, NumPy, pandas
- Cloud & DevOps: AWS (EC2, S3, IAM), Docker (Learning), Jenkins (Learning), CI/CD Concepts, Linux Basics, Kubernetes (Basics)
- Soft Skills: Problem-solving, Analytical Thinking, Teamwork, Adaptability, Continuous Learning

PROJECTS

Wi-Fi Band Switching System – 2024

- Developed a system to improve network efficiency and reliability by switching Wi-Fi bands dynamically.
- Applied optimization ML algorithms such as PSO, Whale Optimization, and Grey Wolf Optimization.
- Technologies: Python, Optimization Algorithms.

AI-Driven Public Safety Complaints Monitoring System – 2025

- Developed a web-based system to analyze and manage public safety complaints using AI. Implemented features like automated classification, sentiment analysis, and department-wise routing for faster resolution. Enabled real-time complaint tracking with a user-friendly interface.
- Technologies: JavaScript, Node.js, Express.js, MongoDB, AI/ML (NLP), HTML, CSS

Dockerized Application Deployment – 2024

- Containerized a web application using Docker to ensure consistent deployment environments.
- Built Docker images and managed container deployments.
- Improved application portability and simplified deployment across systems.
- Tools: Docker, Linux, Git, GitHub.

AWS CI/CD Pipeline Automation System

- Designed an automated CI/CD pipeline to streamline code integration, build, and deployment processes.
- Integrated AWS services to automate the software delivery workflow and reduce manual deployment effort.
- Deployed application builds to EC2 instances while managing access through IAM.
- Services/Tools: AWS CodePipeline, CodeCommit, CodeBuild, CodeDeploy, EC2, S3, IAM.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials
Learned AWS fundamentals including core services, security, pricing, and cloud architecture basics.
 - Introduction to Data Engineering and Big Data
Gained foundational knowledge of data pipelines, big data concepts, and data processing systems.
-

ACHIEVEMENTS

- Winner – Ideathon'24, BIT Special Laboratories: Developed Motorised Solar Scarecrow Bird & Animal Repellent System using sensors and YOLO algorithm.
- Hackathon Finalist – DevsHouse '25 (National Level): Actively participated and developed Motorised Solar Scarecrow, reaching Top 65 out of 5000+ participants.

DECLARATION

I Jothika S, hereby declare that the above written particulars are true to the best of my knowledge.
